

Project Overview

As of April 24, 2013

Hudson Street and McGuffey Road Intersection Improvement

Intersection of Hudson Street & McGuffey Road

Description and Benefits:

The intersection of Hudson Street and McGuffey Road will be realigned to decrease the offset. This project also includes widening pavement for a southbound right-turn lane, removing and replacing existing curbs and sidewalks at the intersection and replacing existing traffic signal. The finished project will provide safer pedestrian accommodations and improved roadway appearance.

Status:

Construction began in April 2013, with completion scheduled for summer 2013.

Costs:

Design	\$100,000
Construction	\$700,000

Contact Information:

Project Manager for construction: Paul Chilton, P.E., tel. (614) 645-0411

Designer: Dynotec, Inc.

Construction Contractor: Decker Construction Company
